SUMMARY

Computer Science undergraduate (CGPA 8.48/10) at BML Munjal University with hands-on experience in full-stack development, applied machine learning, and data science. Currently an AI/ML intern; have shipped multiple production-style web and ML applications. Strong foundations in data structures, algorithms, and software engineering.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C, SQL

ML & Data Science: NumPy, Pandas, Matplotlib, Seaborn, NLP (TF-IDF, similarity scoring, text preprocessing), exploratory data analysis

Backend, Cloud & Frontend: Django, Django REST Framework, Node.js, Express.js, REST APIs, AWS (EC2, S3), Docker, CI/CD, React.js, Tailwind CSS

Databases & Core CS: MySQL, MongoDB, SQLite, Git; Data Structures & Algorithms, OOP, DBMS, Operating Systems

EDUCATION

BML Munjal University	Gurugram, Haryana, India
<i>B.Tech. in Computer Science & Engineering – CGPA: 8.48/10.0</i>	<i>Aug. 2024 – May 2028</i>
Central Public Sr. Sec. School (CBSE), Udaipur – Class XII: 70%	2024
St. Paul's Senior Secondary School (CBSE), Udaipur – Class X: 90%	2022

EXPERIENCE

AI/ML Intern	May 2026 – Present
<i>Kansoft Solutions</i>	<i>Udaipur, Rajasthan, India</i>
- Engineered data-science and NLP workflows in Python (Pandas, NumPy) to clean, transform, and analyze datasets into analysis-ready dataframes and insight reports. - Developed NLP text-processing components for document parsing and information-extraction tasks within client-facing software solutions. - Deployed data and ML workloads on cloud infrastructure within an Agile, production software-services environment.	

PROJECTS

ATS-Ranker: AI-Powered Resume Screening Tool <i>Python, Django REST Framework, NLP</i>	GitHub 2026
- Built an ML-powered resume-ranking platform with REST APIs for PDF upload, job-description parsing, and automated candidate scoring. - Implemented NLP-based similarity scoring (text preprocessing, TF-IDF vectorization, cosine similarity) for resume-job matching with real-time feedback.	
SneakPeak: Full-Stack Sneaker Marketplace <i>Node.js, Express.js, MongoDB, EJS</i>	GitHub 2025
- Built a scalable price-comparison marketplace across 50+ verified vendors with secure authentication, session persistence, and cart CRUD workflows. - Selected as an official study resource for the university's 2025–26 Innovation & Entrepreneurship compendium.	
Quantum Cryptographic Framework – Research Paper <i>Python, IBM Qiskit</i>	2025
- Co-authored a paper on Quantum Key Distribution; implemented a BB84 protocol simulation in Qiskit ($N = 1024$ qubits) modeling intercept-resend eavesdropping. - Empirically validated the theoretical $\sim 25\%$ Quantum Bit Error Rate bound under full interception.	
Personal Developer Portfolio – inflitt.in <i>React 19, Vite, Tailwind CSS, GSAP</i>	GitHub 2026
Designed and deployed a portfolio on a custom domain with live GitHub-contribution and LeetCode-stats integration via REST APIs, optimized for cross-device performance.	

ACHIEVEMENTS & CERTIFICATIONS

- 3rd Place, TechStorm Hackathon** – Led a team to build *Ashrafi*, a personal finance management platform, contributing to ideation, system architecture, and the final project demonstration.
- Competitive Programming** – Consistently solve algorithmic and data structure problems on LeetCode, with a focus on optimizing solutions and enhancing problem-solving skills.
